SEASPAN DORIS

Seaspan Coastal Intermodal's 325' x 55' semi-trailer ro-ro ferry SEASPAN DORIS ex DORIS YORKE (launched 1968 by Victoria Machinery Depot, Victoria BC) received extensive refitting at Allied Shipbuilders (North Vancouver BC). The shipyard removed three of the four Caterpillar 3508 main engines and they were rebuilt at Finning Power Systems (Richmond BC). The fore and aft sections of the main deck were cropped and replaced with approximately 10,000 sq ft of steel plate with new frames and bolted access hatches. New asphalt was laid on the deck, two new Deutz air-cooled gensets and a pair of new John Deere diesel pump-drive engines were installed. Two ballast pumps were overhauled and various other refit work was completed.

LEADER IN MOBILE BROADBAND

Competitive Advantage

Rely on real-time broadband data to help track your catch and get it to market even faster.

Global Reliability

Unlike services with older satellite networks, TracPhone FB150 uses Inmarsat's new I-4 satellite constellation, offering you service for the next decade and beyond!

Catch the latest!

Small & affordable Broadband

Introducing KVH's TracPhone® FB150

Meet the challenges of commercial fishing in the 21st century by bringing true broadband Internet connections to sea with KVH's ultra-compact satellite communications system – the new TracPhone FB150 with Inmarsat FleetBroadband service.

Boost your efficiency, track your catch, and coordinate with buyers and suppliers onshore more easily and more affordably than ever. For the first time, broadband at sea is small enough and affordable enough for you to rely on wherever you operate. And it's all brought to you by KVH, the leader in mobile broadband.

**Get all of the details about KVH TracPhone FB150:
product availability, great introductory hardware pricing,
and introductory airtime service promotions!**
